Introduction

One of the benefits of being a member of the Annex Brands franchise system is having access to award-winning marketing materials. Having served customers since 1986, the Navis Pack & Ship franchise has become known not only for expert, friendly customer service, but also for eye-catching posters, flyers, direct-mail pieces and newspaper inserts. A common element in all our marketing materials, whether in electronic or print form, is the use of our logo, icons, and related artwork.

Using this artwork correctly helps preserve the intrinsic value of the logo. On the contrary, incorrect usage adversely affects its value and jeopardizes or weakens its trademark protection and the legal right to keep people from altering or copying our trademarks for their own use. Through proper use of our materials, the Navis Pack & Ship brand is strengthened, resulting in credibility for our customers, vendors, and the public at-large.

We have created this manual as a guide in establishing a consistent brand image throughout the Navis Pack & Ship system. Its purpose is to provide clear, concise guidelines for proper use of our copyrighted and trademarked materials. In the event you encounter a situation not covered in this manual, please contact the Annex Brands Marketing Communications Department to discuss your project before proceeding. The Department has authority and responsibility for the maintenance and control of the Navis Pack & Ship trademarks and is your resource for guidance and clarification in applying proper use.

This Navis Pack & Ship Style Guide is available in Adobe Acrobat® Portable Document Format (PDF) on www.annexbrands.com/logos with username of "annex_logos" and password "a11logos" (where the 2nd and 3rd characters are numbers) When viewing the .pdf file, please note some images and colors may be subject to distortion due to differences in computer monitor displays using Red/Green/Blue (RGB) technology versus print materials that use either Cyan/Magenta/Yellow/Black (CMYK or 4-color) or Pantone Matching System (PMS) ink processing.

Section 1 Navis Pack & Ship Colors and Fonts

Section Description

Using the Navis Pack & Ship (Navis) colors and fonts correctly is vital for establishing consistency with our brand. This section defines the approved colors and fonts for various applications.

Navis Pack & Ship Colors

PANTONER

Process

The Navis logo consists of two colors: a blue and a black. These colors must be reproduced accurately and consistently to make the Navis brand instantly recognizable to anyone.

The Navis blue and black color specifications are defined here for use in print, on the web and exterior signs.

PMS

Print

The Navis Pack & Ship colors can be recreated accurately in several ways for print. The required colors for the Navis logo can be reproduced in several formats.

For spot printing

The Pantone Matching System (PMS) colors are PMS 300 and PMS Process Black for both coated and uncoated printing.

For full process color

CMYK (cyan, magenta, yellow and black): Navis blue is c: 100, m: 44, y: 0, k: 0, and Navis black is c: 0, m: 0, y: 0, k: 100 for both coated and uncoated printing.

RGB

R: 35 G: 31

For the Web

RGB (red, green and blue): Navis blue is r: 0, g: 121, b: 193, and Navis black is r: 35, g: 31, b: 32.

Navis Pack & Ship Fonts

The Annex Brands Home Office has selected two typefaces or fonts to be used in all printed materials. Again, this is to create a consistent look and feel for the Navis brand. Twentieth Century is recommended for the primary typeface and Times New Roman is the secondary typeface. Both Twentieth Century and Times New Roman are available in a variety of styles and weights including bold, italic, oblique, extended bold, etc.

Twentieth Century - Sans Serif Typeface

Times New Roman – Serif Typeface

This font can be utilized by purchasing it online, www.adobe.com, www.linotype.com or www.fonts.com.

Electronic File Format Guide

This section is a guide on file formats and the different file types appropriate for various programs. Some of the most common file types are Encapsulated Post Script (.eps), Joint Photographic Experts Group (.jpg), Graphic Interchange Format (.gif) and Portable Network Graphics (PNG)

.eps – This file format works best for print, and for such programs used for high end graphics such as Adobe Photoshop, Adobe Illustrator and Adobe InDesign. Sometimes this is referred to as a "vectored format", meaning it can be enlarged or reduced without changing the resolution or clarity.

.jpg – This file format is a rastered graphic and is best if used with Web sites, and such programs as Microsoft Word and Microsoft PowerPoint.

.gif – This file format is a rastered graphic and is best if used with Web sites.

.png – This file format was created to replace .gif files, improving the data compression resulting in lower file sizes. It's the new standard for images used on the Internet.

Neither .gif's nor .jpg's should be used in printed materials because they are usually lower-resolution. Lower-resolution images usually are smaller in file size then higher-resolution images, making them preferred for use on the web. The problem with low-resolution files in printed materials is they often appear "grainy" or pixilated and thus don't help create a finished high-quality printed piece.

Many of the file types for the Navis Pack & Ship logo, icons and vendor logos mentioned in this manual are available for download from the 360° system. You can find them in the Library > Marketing & Communications. If you have questions on file types not covered in this document, please contact the Annex Brands' Marketing Communications Department.

Navis Pack & Ship logo go online to: www.annexbrands.com/logos; the current password is "a11logos" (where the 2nd and 3rd characters are numbers) but is subject to change without notice. Contact the Marketing Communications Department if you are having difficulty in downloading logos. On that page you can download the Navis Pack & Ship logos in color or black & white, in .eps or .jpg format. The UPS, FedEx, USPS and DHL approved logos are also available to download.

Software & other formats	Preferred File Types
Microsoft Word	.jpg or .gif
Microsoft Publisher	.jpg or .gif
Web sites	.jpg, .gif or .png
Other desktop publishing software	.eps
Advertising/Promotional Pieces (posters, shirts, banners, pens, etc.)	.eps

Section 2 Navis Pack & Ship Logo Guidelines

Section Description

One of the main benefits of being an Annex Brands franchisee is the strength of the Navis Pack & Ship brand, including the logo for identity. The Home Office, your staff and vendors all take part in working together to keep the Navis Pack & Ship brand strong. To ensure our logo looks its best, we have created the following requirements for use of the logo, along with samples of correct usages.

Navis Pack & Ship Logo

The Navis Pack & Ship logo consists of a large black "N" with a blue box inside of the "N". The word "Navis" is then either aligned to the right of the large "N" or centered directly below it. The "Pack & Ship" text is used in the horizontal version fully justified underneath the text "Navis".

Correct: Navis Pack & Ship logos

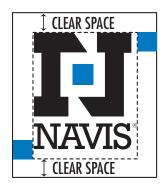

Clear Space Around Logo

Most corporate logos and brands incorporate the concept of clear space. Clear space is basically the white space required to allow the Navis Pack & Ship mark room to breathe. This white space ensures the Navis Pack & Ship logo is being represented in the best possible manner without interference from any other graphical elements. Please refer to the samples shown to the right to see the minimum clear space required. We are defining the clear space as at least the height of the box inside the large "N" in Navis, whatever its size.

Clear Space:

Height of blue box in logo.

Clear Space:

Height of blue box in logo.

Correct Logo Usage

When using Navis Pack & Ship in text, notice that "&" is always the ampersand.

Correct: Navis Pack & Ship

Incorrect: Navis Pack and Ship

Incorrect: NavisPack and Ships

The Navis Pack & Ship logo may be used alone or with the tagline.

Both versions have four approved variations.

- The most common is the two-color version with the Navis blue and black.
- A grey scale or solid black version can be used in black and white printing and other one-color instances.
- 3. Solid white may be used over dark backgrounds.
- 4. The logo produced all in one color other than black is approved in some circumstances. A example of approved use, is if all logos of companies in a marketing piece are in one color (i.e. orange). You may color the logo to be consistent with all the other logos. Currently, these are the only two approved uses of the coloring of the logo other than the three shown above. If you have questions about a specific color for the logo, please contact the Marketing Communications Department.

Correct:

Two-color version

Correct:

Black & white version

Correct:

Solid white version

Correct:

Solid one-color version

Incorrect Logo Usage

Please see the following samples of incorrect uses of the Navis logo. If you have any additional questions on use of the Navis logo that is not covered in this section, please contact the Marketing Communications Department at the Home Office.

Do not alter the size of the text.

Do not change the layout of the logo.

Do not stretch or twist logo.

Do not use over non-neutral backgrounds.

Do not reverse colors or use other color combinations.

Do not change the layout of the logo.

Do not create custom taglines.

Do not place graphics or text in the clear space area.
